

EDUCATIONAL PROGRAM

Series 600

POLICY TITLE OUTSIDE RESOURCE PEOPLE

No. 603.13

The Board of Education recognizes that one of the resources of the school system is to be found in the people of the community who have special knowledge and particular talents to contribute to the school program. The Board, therefore, encourages the use of community resources and citizens to assist in enhancing the educational program. Expertise should be used when it directly correlates to the teaching and learning of the course or class. Use of outside personnel resources shall follow procedures approved by the Superintendent.

It is a matter of courtesy, as well as a method of avoiding possible difficulty, that approval be obtained from the building principal or designee before outside resource people are contacted or scheduled into the schools. Outside resources are used on occasion and not on an ongoing basis.
